

FIELD RULES
(Updated May 2025)
COMMON TO ALL FIELDS

1. A current AMA license is required
2. Model flying must be in accordance with the AMA National Model Aircraft Safety Code
3. Only people essential to flight operations are permitted in the pit area
4. If using a frequency other than 2.4 GHz (72MHz, 50MHz, etc.), You are responsible for checking if there are others using the same frequency
5. Transmitters must be impounded when not in use
6. Maximum of four planes in the air at one time
7. No taxiing within the pit area
8. Flight operations must be from designated pilot stations or control point
9. All engines (with displacement greater than .09 cubic inch) must have an effective muffler. **SEE NOISE RECOMMENDATIONS** (no open, flow through, or stack type mufflers)
10. Carry-in/carry-out.
11. For safety reasons, it is strongly recommended that you do not fly alone

NORTHAMPTON PARK

1. **“RADIO CONTROL MODEL AIRCRAFT ONLY”**
2. Flying hours are 10 am to sunset
3. An observer for full-scale aircraft is required
4. Do not fly higher than approximately 400 feet
5. Do not fly west of northwest boundary flag except when taking off or landing
6. Engine testing is to be performed in the designated area
7. Tuesday evenings from 4 PM till sunset are reserved for training (May through September)

Rule enforcement assistance: RCCR Pres. Duane Fregoe (585) 210-8310
(It would be helpful to obtain the name and AMA# of those who do not cooperate)

HASMAN FIELD

1. **RCCR members only**
2. A special pass, issued by RCCR, is required
3. No restrictions on flying hours
4. Keep vehicles off all runways.
